DETAILED ACTION

Response to Amendment

This office action is in response to amendment filed on November 02, 2006. Original application contained Claims 1-15. Applicant currently submitted amendments canceling original Claims 1-15, and adding new claims 16-30. The amendment filed have been entered and made of record. Therefore, presently claims 16-30 are pending for consideration.

Response to Arguments

Applicant's arguments filed on November 02, 2006 have been fully considered but are moot in view of the new ground(s) of rejection.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2131

Claims 16-30 of instant application 10/700,411 (hereafter '411) are rejected on the ground of nonstatutory double patenting over claims 1-21 of U. S. Patent No. 5,898,830 (hereafter '830) since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Claims 16-30 of instant application '411 are rejected under the judicially created doctrine of obviousness-double patenting as being unpatentable over claims 1-21 of '830. Although the conflicting claims are not identical, they are not patentably distinct from each other because in view of the obviousness type double patenting rationale enunciated in **Georgia-Pacific Corp. v. United States Gypsum Co.**, 195 F.3d 1322, 1326, 52 USPQ2d 1590, 1593 (Fed. Cir. 1999), both application claim subject matter that relates to computer network security that selectively allows acceptable computer transmissions to pass through it and disallows other non-acceptable computer transmissions, and the instant application's above mentioned claims merely define a pair of firewall devices that cooperate to form an encrypted virtual private connection and utilize DNS to facilitate a connection between the networks which is a obvious variation of programmable transparency of firewall which is achieved by establishing DNS mappings between remote hosts to be accessed through one of the network interfaces and respective virtual hosts on that interface of the invention as claimed in patent '830.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
